

****For Immediate Release****

The Green Register is Ten Years Old Please Come & Celebrate a Decade Of Success

The Steelcase showroom, Manchester

3 November, 5.30pm-8pm.

The Green Register (TGR) is inviting construction industry professionals to a FREE event to mark its 10th year as one of the UK's leading organisations promoting sustainable building practices and providing unique industry-led training events.

The event will be headlining high profile speaker Oliver Drerup, Senior Consultant for Housing Systems at the Canada Mortgage & Housing Corporation, who will be explaining the innovative 'Super E' principles and how they can be applied in the UK.

Super E homes are energy-efficient, healthy, comfortable, affordable and environmentally friendly. They follow the Canadian 'House-as-a-system' approach meaning that each component of the home is considered for its impact on the whole and the homes are endorsed by the Government of Canada to completion.

Lucy Pedler, Director of The Green Register said:

"We are delighted to have Oliver as our guest speaker for what will be a very upbeat event. The Super E homes are very low carbon, energy efficient buildings which is something we at The Green Register have been promoting since we began in 2000."

Lucy added:

"Oliver's talk will provide some healthy debate about how we achieve sustainable houses in this tough economic environment and we look forward to an evening of lively discussion and idea-sharing."

This event is free but places are limited so please book in advance. For full details and to book a free place please visit www.greenregister.org.uk, email mail@greenregister.org.uk or call 0117 3773490.

Notes to Editor:

1. To arrange a press pass for this event please contact Mel Woodland on 0117 3773490. For general enquiries about the Green Register call 0117 3773490 or see the website at www.greenregister.org.uk.
2. The Green Register is an independent, self-funded organisation which pioneers sustainable building practices across all sectors of the construction industry.
3. The Green Register was launched in October 2000 by architectural practice Archipeleco. The organisation was given start-up funding and support by Southwark Building Control and Sustainable Energy Action.
