

\*\*\* PRESS RELEASE - for immediate release \*\*\*

## WUFI® training back in London by popular demand

Sustainable building pioneers The Green Register offer a rare opportunity for construction professionals to attend specialist **WUFI® Pro** and **WUFI® 2D Heat & Moisture Simulation Workshops** at the Human Rights Action Centre in London on **March 26-27** and **March 28-29 2014**.

*"Following the success of our collaboration with the leading UK WUFI experts in 2013, The Green Register is delighted to be running the world class WUFI software course for construction professionals again in London,"* said Lucy Pedler, Director of The Green Register.

The two-day **WUFI® Pro** course - run by expert trainers Christian Bludau (Fraunhofer Institute for Building Physics, Department for Hygrothermics) and Joseph Little (Joseph Little Architects and Building Life Consultancy) - provides a practical, hands-on introduction to WUFI® Pro 'hygrothermal' numerical simulation. It is the world leading simulation software for understanding the risk of interstitial condensation, mould, rot and freeze-thaw in buildings.

The advanced **WUFI® 2D** course, being held in London for the very first time, follows on from the success of the fully booked WUFI® Pro course held in 2013, giving an in-depth view of WUFI® 2D for critical construction junctions and unique conditions that cannot be simulated in WUFI® Pro.

*"Building Life Consultancy are delighted to partner with The Green Register to bring high quality risk evaluation software to London"* commented trainer Joseph Little.

Both days of training include **hands-on workshops using the software**, and the **full version of the WUFI® Pro software with an 8-week license**, as well as access to support on the online WUFI® Forum for that period.

In 2013, the two-day **WUFI® Pro Heat & Moisture Simulation Workshop** was a sell-out success, with delegates seizing the opportunity to attend from as far afield as Australia. Attendees commented that the software training was *"very useful for current projects"* and *"an excellent overview."*

The 2013 WUFI Pro workshop sold out and places are extremely limited so interested delegates are advised to book early to avoid disappointment. A special **early bird price runs for both courses -**

**Book before 13 Feb - £600 (TGR members) / £650 (non-members)**

**Book after 13 Feb - £650 (TGR members) / £700 members**

Book online at [www.greenregister.org.uk](http://www.greenregister.org.uk)

- ENDS -

## Notes to Editors:

1. To arrange a press pass for this event, and for all enquiries, interviews & information requests please call 0117 3773490 / 07960 227015 or email [sally@greenregister.org.uk](mailto:sally@greenregister.org.uk)
2. The Green Register is an independent, non-profit training and membership organisation founded in 2000 which pioneers sustainable building practices across all sectors of the construction industry. For more information and bookings please visit the website at [www.greenregister.org.uk](http://www.greenregister.org.uk)
3. Course fees include the 2-day course tuition, course materials, light refreshments and lunch on both days, and the full version of the WUFI® Pro software with an 8-week temporary licence, as well as access to support on the online WUFI® Forum for that period
4. The venue for both two-day courses is: The Human Rights Action Centre, 17 - 25 New Inn Yard, London, EC2A 3EA
5. For more information on WUFI Pro software, visit [www.wufi-pro.com](http://www.wufi-pro.com)
6. The workshop is open to all building professionals: architects, engineers, surveyors, insulation suppliers, system manufacturers, builders and anyone with a focus on fabric performance
7. About the trainers -

### **Joseph Little, BArch, MSc Arch. AEES**

Joseph Little is the principal of Joseph Little Architects and Building Life Consultancy. He graduated from the UCD School of Architecture in 1996 and from the Graduate School of the Environment at the Centre for Alternative Technology in 2008. Joseph set-up his own practice in 2003 when he realised that his passion for low energy, environmental building design could only be realised outside of mainstream architectural practices and launched Building Life Consultancy in February 2009. Joseph's consultancy has recently held WUFI® hygrothermal training in Glasgow, Leeds and Dublin with Fraunhofer IBP and thermal bridge training in Dublin. Historic Scotland released 'Technical Paper 15' in Summer 2012 which is a significant report by Little, and colleague Calina Ferraro, on hygrothermal simulation and internal insulation retrofits in Scotland.

### **Christian Bludau, Dipl.-ing**

Christian Bludau is a researcher at the Fraunhofer Institute for Building Physics, Department for Hygrothermics, in Germany. Christian received his Diploma in Civil Engineering at the Technical University of Munich, Germany in 2001. After his studies he worked as research assistant at the Institute for Building Materials and the Institute for Structural Engineering at the University of the German Armed Forces in Munich. He has worked as researcher at the Fraunhofer Institute for Building Physics since 2005 and from 2011 he has held a lectureship for building physics / moisture control in building at the University of Applied Sciences in Augsburg. His research interests focus on the hygrothermal conditions in wall and roof constructions with special interests in the thermal behaviour of flat roofs. Christian has been involved in many WUFI® seminars, lessons and workshops during the last few years.
